IMAGINE!
WE SOLVE IT

“ Your qualified solution partner in statical project...”

STADIZAYN

structural & earthquake
engineering

WHO ARE WE?

Stadizayn was established to provide quality project services on an international scale for the static design of buildings. Our company is a qualified solution partner for special buildings and ambitious architectural projects. It provides engineering and static project services for all kinds of superstructures on static projects. It offers special solutions for high-rise buildings, steel structures, posttensioned and prestressed structures, performance analysis of structures, and structures with insulators. In addition to statical project, it also provides services in static project control and consultancy, project implementation control at the construction site and special earthquake engineering solutions

OUR MISSION

"To be beneficial to humanity by providing qualified engineering services in line with fully aware engineering knowledge for the realization of architectural projects."

OUR VISION

"To provide engineering support to the construction of buildings at international standards on a global scale, with a professional team that continues the continuous education process and keeps up with the conditions of the age"

OUR PRINCIPLES

1. Thoughts come to life.

Requests of employers and architects are our first priority.

2. Safe Buildings

Safe building project within national and international regulations is our goal.

3. Economic solutions

We always go to the solution with more than one alternative for the most economical solution.

4. We are solution oriented

We don't say it won't happen right away, we'll see if it happens.

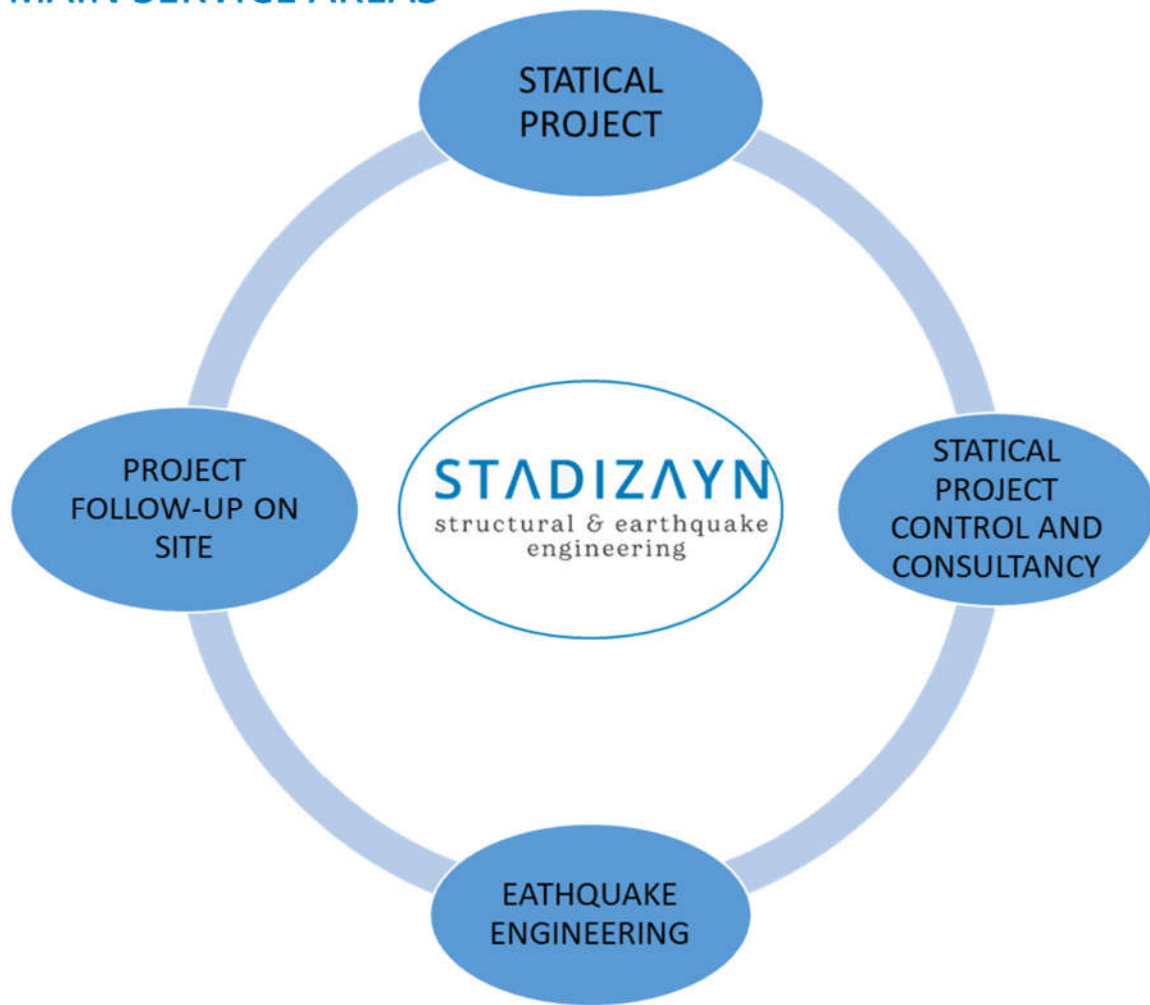

5. We always offer an alternative solution

We always think about the employer and offer alternative solutions.

6. International regulations

Our constantly evolving engineering experience is included in international regulations.

OUR MAIN SERVICE AREAS

OUR AREAS OF EXPERTISE

HIGHRISE BUILDINGS

ECONOMIC STEEL STR. SOLUTIONS

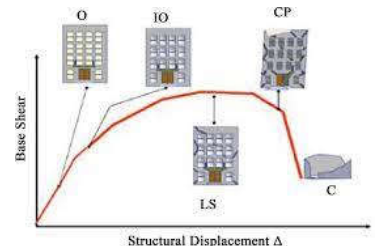

POST-TENSIONED SOLUTIONS

PRESTRESSED STRUCTURES

BUILDINGS WITH
BASE ISOLATION

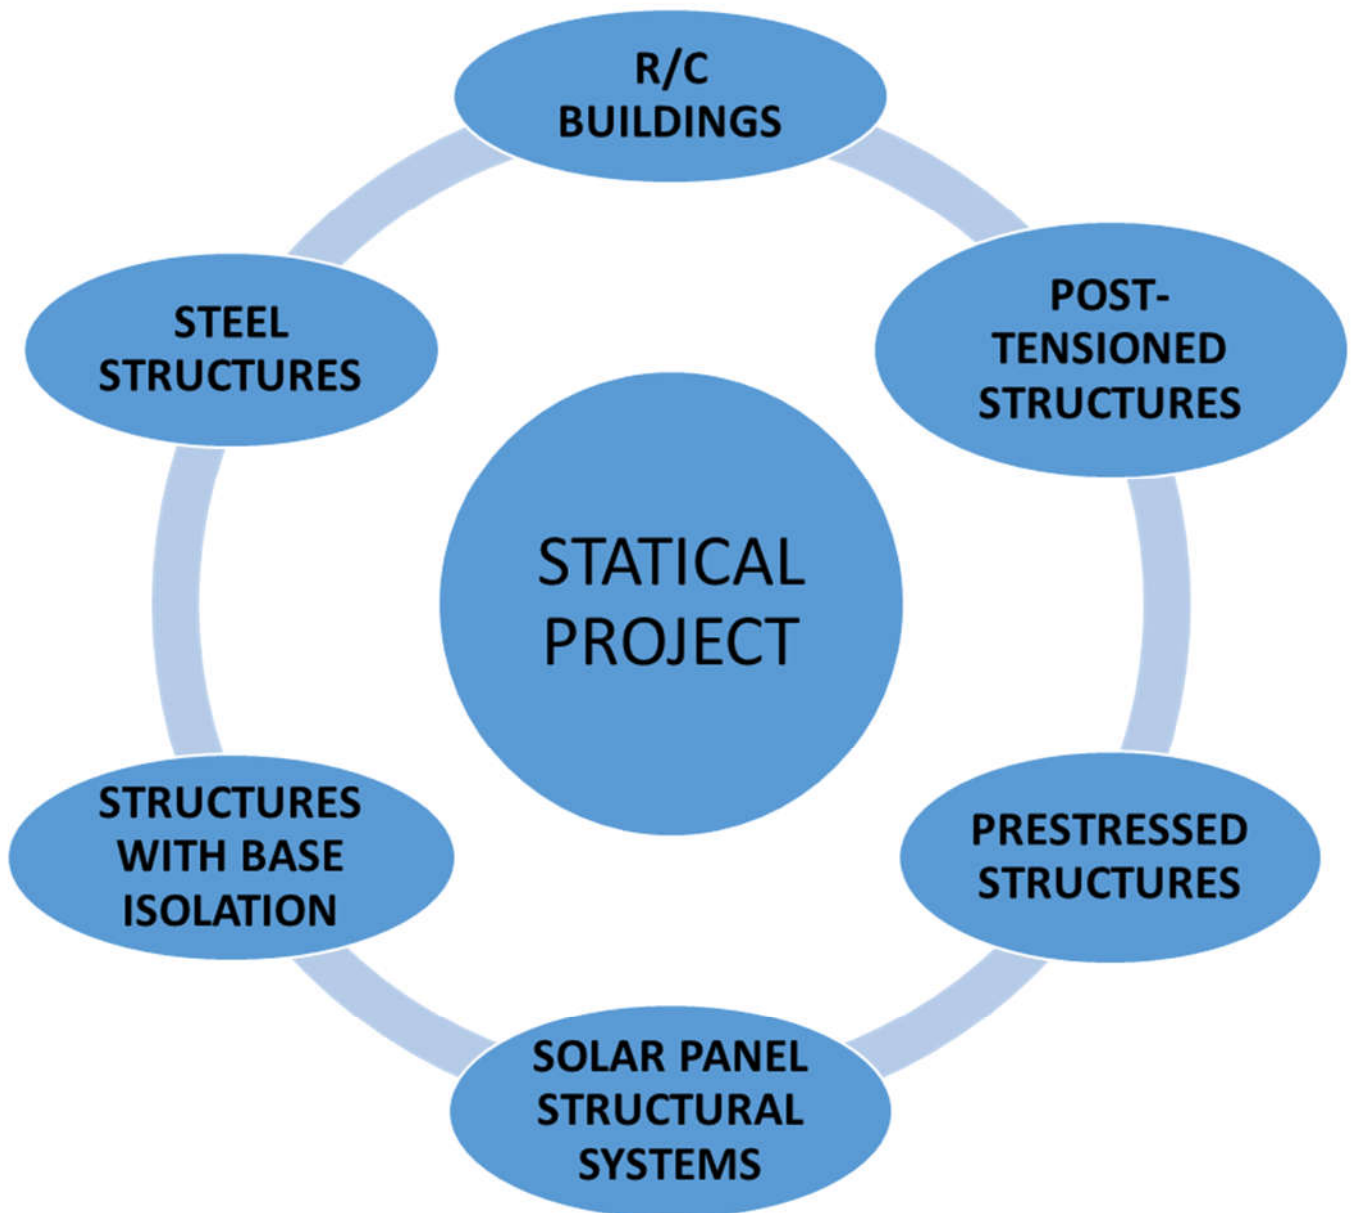

PERFORMANCE BASED ANALYSIS
